1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16

REMIX DECKS MODE LAYOUT

Only Decks C and D are mapped to be Remix Decks

Remix Decks (empty) view; all pad lights off
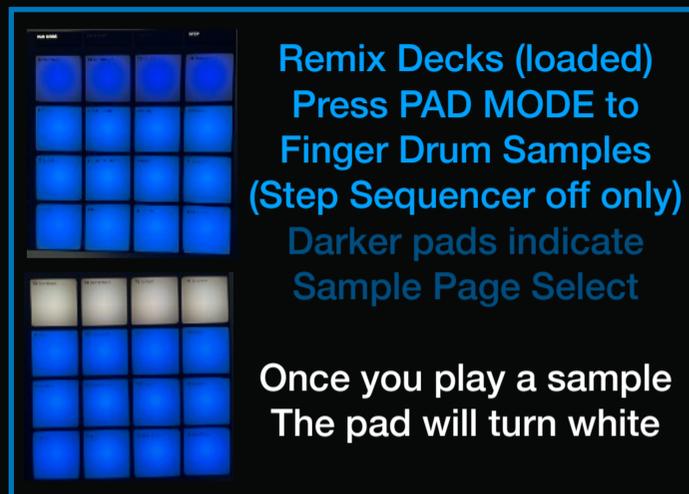

Remix Decks (loaded) Press PAD MODE to Finger Drum Samples (Step Sequencer off only)
Darker pads indicate Sample Page Select

Once you play a sample The pad will turn white
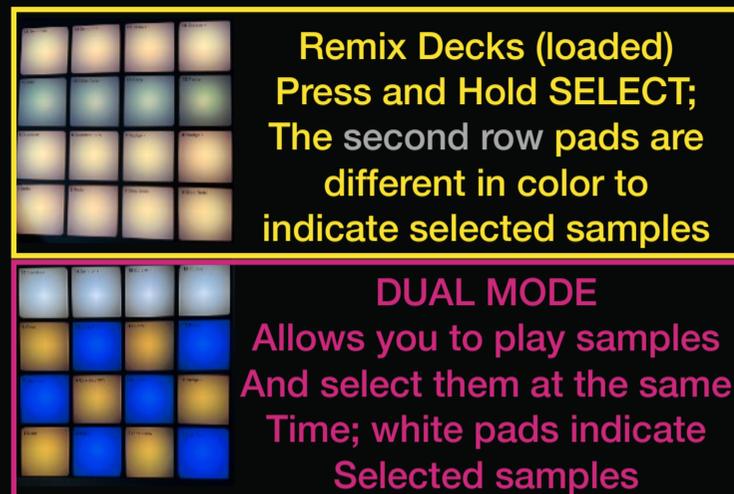

Remix Decks (loaded) Press and Hold SELECT; The second row pads are different in color to indicate selected samples

DUAL MODE Allows you to play samples And select them at the same Time; white pads indicate Selected samples

Knob pages 6-9 control Remix Deck Parameters such as Volume, Filter, FX, Key, Sequencer Step Size, Trigger Type, Punch Mode, Gate, Latch, Loop or 1-Shot, Select Sample Source and Capture, Reverse, Delete, and Load.

TIP: These knob pages apply to both Remix C and D but only one at a time; you must first select Remix Deck focus button on screen 6 or push and hold SHIFT and then click left on the 4D encoder for Remix Deck C or to the right for Remix Deck D.

Slot 1 (green) represents the Kick
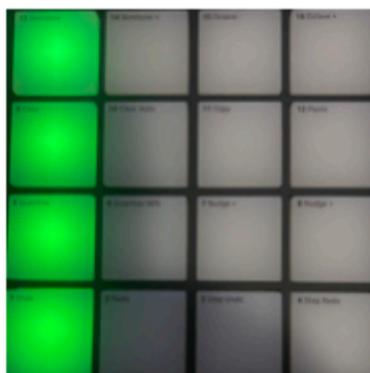

Slot 2 (amber) represents the Snare
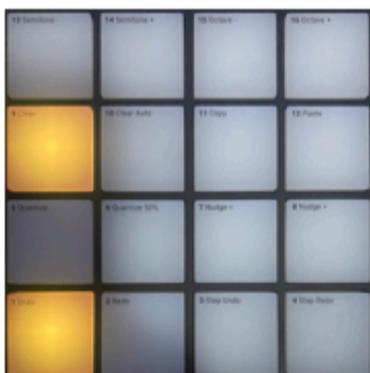

Slot 3 (blue) represents a Hi Hat
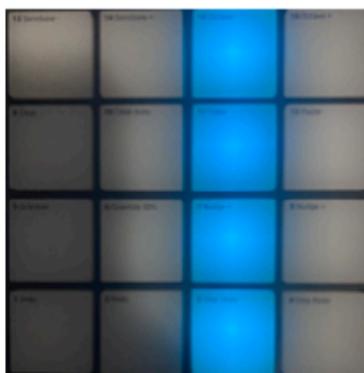

Slot 4 (purple) represents a Low Tom
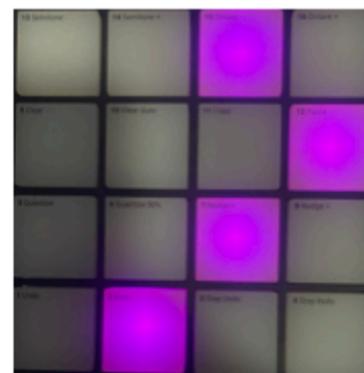

TIP: to erase a step simply press the step (pad) you want to erase. To erase all STEPS on a SLOT, press and hold [SHIFT] and the corresponding [SEQ_] button at the top of the right screen and it will remove all steps on that slot only.

Press Seq 1-4 and program a step pattern on the 16 pads. Pattern length can be shorten to make interesting odd time signature beats; do the same for all 4 Slots.

*To access secondary layer (to the right of the slash /) Press and hold "Shift" first.

## Pad Page G-H and Knob Pages 9-10

Only Decks C and D are mapped to be Stem Decks
